

TOWER FARMS HOME

FARM ANYWHERE, ANYTIME!

THE ULTIMATE
HOME
FARMING
TECHNOLOGY

"Farm Anywhere, Anytime"

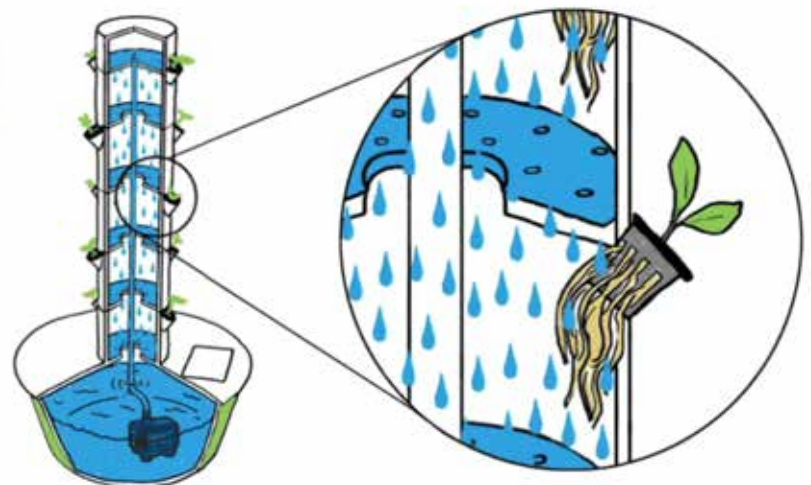

Tower farms

are a cutting-edge patented american farming technology that combines two methods of farming; Vertical farming and “Aeroponics”.

The term “**Vertical Farming**” comes from the way the crops are stacked on top of each other inside of special towers in a vertical fashion, instead of the conventional horizontal layout.

The term “**Aeroponics**”, is the process of growing crops with their roots hanging in the air without the use of soil or another major growing medium, hence the name “Aero” (meaning “Air”) and “ponics” (meaning “Labor”).

Ideal

... for those who like to grow their crops at home, Tower Farms enable crops to grow 100% naturally using the specially formulated mineral solution, "TowerTonic", which is provided with the towers + 1 Solution for all crops.

With this

Technology,

crops carry more nutrients than their organic siblings harvested through conventional means. They can grow larger in size, more aromatic, fresher tasting, and have more vibrant colors, truly "*Beyond Organic*".

LIVING PIECE OF ART

Tower Farms

can be placed in the living room, balcony or anywhere as long as it is in a controlled environment. Each tower can be suited with its own built-in irrigation system and lighting package to create a personal little portable farm that yields generous number of crops, and makes for a gorgeous home live-décor.

BENEFITS

Your Own Little
Farm-Pet at Home
(Consumes 92% less water)

No Chemicals or
Pesticides

Very Space
Efficient
(80% Space Savings)

No Previous
Experience
Required

Full
All-In-One
Solution for
Immediate
Hassle-Free
Farming

Plant Anything
Regardless of
Season

Stunning
Live-Décor
